

GPU Monitor

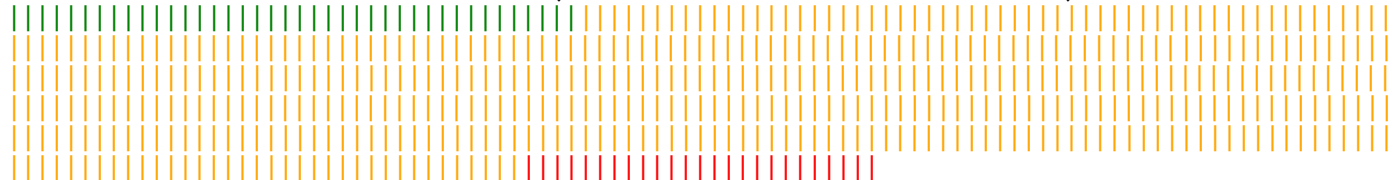

(Please email rchelp@northeastern.edu for feedback or suggestions.)

| : idle nodes

| : mixed nodes (all GPUs may or may not be busy. See Note at bottom.)

| : allocated nodes

Overall Cluster GPU nodes Utilization (for GPU nodes available to the user):

Number of GPU jobs pending in queue:

a100:34

a6000:4

h100:4

h200:100

k80:2

v100-sxm2:6

Disclaimer: This app is intended to provide a sense of how many GPU nodes are free/allocated at the moment, helping researchers decide which GPU to use in their jobs right now.

Please note that actual wait times might also depend on other factors such as user's current fairshare score, in addition to resource availability.

```

Note: For individual node GPU utilization, see

```
sinfo -n nodename --Format="Gres:30,GresUsed:30"
```

or

```
scontrol show node nodename
```

in a terminal, where nodename is the actual name of the node, e.g. d1021
